ABOUT US

Barrett Burston Malting Co. has been a driving force in the Australian malt industry since 1861. We have been supplying brewers with the best quality Australian malt for over 150 years; and we continue to innovate.

Our process begins with the finest Australian barley, which we ensure meets our strict quality standards. Our experienced team monitor and test the barley throughout the malting process to ensure we provide our customers with only the highest quality, consistent product.

Whether you're purchasing malt for a large-scale operation or starting out as a small craft brewery, you can trust our dedication to the quality of every bag that leaves our malting facilities.

OUR HISTORY

Barrett Burston Malting traces back to the merging of two families, the Barretts and the Burstons. Both families have been associated with the Australian malting industry since the 1800s.

William Barrett was an enterprising bank clerk in England who began malting as a part time operation. Meanwhile, Samuel Burston was a storekeeper in a small Victorian country town who saw the opportunity to buy barley from his clients and use it for malting.

In the years that followed there was much competition between these two pioneering malting families until the merger finally took place in 1912 with the founding of Barrett Bros. and Burston and Co. Pty Ltd, heralding a new era in malt production that continues to this day.

THE MALTING PROCESS

Steeping

The purpose of the steeping is to increase the moisture in the grain so that germination can be initiated. The steeping process can take up to 2 days and consists of the grain being immersed in aerated & attemperated water.

The water is then drained off and the grain rests whilst air is drawn through and the carbon dioxide is removed. The goal is evenly hydrated, germinating grains.

Germination

After steeping, the grain is transferred and distributed evenly throughout a germination vessel. During the germination process, the grain is grown under conditions, in which the moisture, temperature, and airflow parameters are carefully controlled.

The germinating barley is also periodically "turned" or mixed to promote a homogeneous product.

It is during this stage where barley is 'modified' and converted into 'green malt' ready for kilning. The germination phase can take up to 4-5 days, depending on the product being made.

Kilning

Kilning involves the use of heated air to dry the grain in order to produce a stable product that can be easily stored and milled. Large volumes of hot air are blown through the evenly loaded grain bed.

By varying air flows and kiln temperatures, the maltster can control the desired flavour and colour profiles of the malt. Depending on the type of malt being produced, kilning can take up to 24 hours.

Roasting

Roasting takes place in a roasting drum which can hold a batch size of 2.8 to 3.6 tonnes. The average roasting time is 2 – 3 hours with an air temperature of up to 250°C, dependent on the product being made.

The roasted product is then transferred to the cooler where its temperature is reduced to fix the colour and flavour compounds.

OUR LOCATIONS

Perth

Our Perth Maltings is situated approximately 13km southeast of the Perth CBD. The maltings has an annual production capacity of 50,000 tonnes & on-site malt storage of 12,000 tonnes.

Pinkenba

Our Pinkenba Maltings is situated 12km from Brisbane CBD. The maltings has a batch size of 360 tonnes & on-site malt storage of 5000 tonnes.

Geelong

Our Geelong Maltings is situated 70km southwest of Melbourne. The maltings has an annual production of 100,000 tonnes of malt & on-site malt storage of 6000 tonnes.

ENVIRONMENT, HEALTH & SAFETY

At Barrett Burston Malting we pride ourselves on having a strong safety culture where no job is considered so important that it cannot be done safely.

The health, safety and welfare of our employees, contractors, visitors, and customers is paramount, and no aspect of the business can undermine this ethos.

We are committed to providing and maintaining a safe and healthy working environment for all employees, contractors and visitors and customers to minimise the effects our business has on the environment.

FOOD SAFETY & QUALITY

Barrett Burston Malting is committed to providing Quality and Food Safe products to our customers. All our sites have Food Safety plans in place

Compliance & Regulation:

- Our products and packaging comply with the Food Standards code (FSANZ) and other applicable EU regulations.
- Due diligence testing is carried out to ensure NDMA, mycotoxins, agrichemicals are within acceptable levels.
- Our products are free from Genetically Modified raw materials and have not been subject to any form of irradiation or ionisation treatment.

Allergen & Consumption Information:

- Malt products contain gluten (barley, wheat) which can cause an adverse reaction for people with a gluten intolerance.
- Malt is a product intended to undergo further processing. It is not intended to be consumed as is.

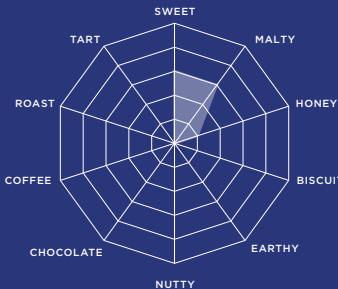

Storage & Shelf Life:

Malt can be stored for long periods but best used within 12 months of delivery. Products should be stored in cool, dry and clean conditions in an environment free from pests, strong odours and weather.

Pale Malt

Our Pale Malt is a quintessential Australian malt which can be used in any beer style.

Produced using Australian 2-row barley, it will impart a light, golden colour to your brews. It's clean with a light malty flavour.

DETAILS	TYPICAL ANALYSIS
SUGGESTED USE All Beer Types	
FLAVOUR PROFILE Malty & Sweet (with gentle notes of honey).	COLOUR °EBC 3.5-4.5

CRYER MALT

WWW.CRYERMALT.COM

Australian Extra Pale Malt

Australian Extra Pale Malt is an Australian-grown and produced, premium malt featuring the lightest colour of our range.

It is the quintessential Australian barley malt. Produced exclusively using Australian 2-row barley, this malt will impart a light, golden colour. It's clean with a gentle malty flavour and can be used to brew a wide variety of beer styles.

DETAILS	TYPICAL ANALYSIS
SUGGESTED USE All Beer Types	
FLAVOUR PROFILE Malty & Sweet (with gentle notes of honey).	COLOUR °EBC 3.4 max.
COLOUR PROFILE Golden colour	MOISTURE (%) 5.0 max.
INCLUSION RATE Up to 100%	PROTEIN (%) 9.0-12
AVAILABLE PACKAGING 25kg Bags, Bulk Bags, Bulk Silo	EXTRACT (%) 80.0 min.

Distilling Malt

Our Distilling Malt is a specialist distilling malt that is produced from specialty selected varieties that will provide distillers maximum spirit yield (or a high spirit yield), as well as enough enzymatic reaction to convert any source of starch to the mash.

DETAILS	TYPICAL ANALYSIS
SUGGESTED USE Grain Distilled Spirit Production	
FLAVOUR PROFILE Not typically used for flavour	PREDICTED SPIRIT YIELD 395 L/t
COLOUR PROFILE Golden colour	DIASTATIC POWER (°WK) 250 min.
INCLUSION RATE Up to 100%	COLOUR °EBC 5.0 max.
AVAILABLE PACKAGING 25kg Bags, Bulk Bags, Bulk Silo	MOISTURE (%) 5.0 max.
	EXTRACT (%) 80.0 min.

Vienna Malt

Our Vienna Malt imparts a low to medium malty sweetness and a light golden to soft orange hue to your beer.

It's perfect when used for European beer styles such as Vienna Lager, and Märzens as well as an all-round go-to for extra body without any excessive malty sweetness.

DETAILS	TYPICAL ANALYSIS
SUGGESTED USE Märzens, Golden Ale, Pale Ale, IPA	 
FLAVOUR PROFILE Malty, Sweet	COLOUR °EBC 8.0- 12.0
COLOUR PROFILE A Light Gold to Soft Orange	MOISTURE (%) N/A

Wheat Malt

When used at a low percentage of the malt grist, our Wheat Malt is great for increased body, mouth feel and head retention.

It can also be used as a base malt, imparting clean, wheaty flavours for classic wheat beer styles.

DETAILS	TYPICAL ANALYSIS
SUGGESTED USE Hefeweizen, Kolsch, Gose, Berliner Weisse	 
FLAVOUR PROFILE Clean, wheat flavour	COLOUR °EBC 6.0 max.
COLOUR PROFILE Golden colour	MOISTURE (%) 5.5 max.
INCLUSION RATE Up to 100%	PROTEIN (%) 12.5 max

Munich Malt

Munich Malt is kilned longer and at higher temperatures than Ale Malt. During the malting process, the green malt is “stewed” in the early stages of kilning to aid colour development.

Munich is slightly darker than Vienna Malt which is made in a similar way. It's possible to use as a base malt, offering biscuity almost nutty flavours, but also great for adding malt depth without having overpowering sweetness.

DETAILS	TYPICAL ANALYSIS
SUGGESTED USE Pale Ale, IPA, Amber Ale, Bocks	 ▲
FLAVOUR PROFILE Biscuit & Nutty	COLOUR °EBC 14-20
COLOUR PROFILE Light gold to orange	MOISTURE (%) N/A
INCLUSION RATE Up to 100%	PROTEIN (%) N/A

Dark Munich Malt

Dark Munich offers a deeper, more robust malty sweetness versus its lighter Munich counterpart.

Imparting an intense bready character, it is best used as part of a fully charged specialty malt grist for darker beer styles.

DETAILS	TYPICAL ANALYSIS
SUGGESTED USE Dark Lager, Dark Ale, Stout	 ▲
FLAVOR PROFILE Bready, sweet	COLOUR °EBC 21-32
COLOR PROFILE Light gold to orange	MOISTURE (%) N/A
